Sanitizer concentration log

Business name: Example Bistro **Location (premises, vehicle):** Kitchen **Year, month:** 11/2026

Product: Quaternary ammonium (QAC) **Target range (from label):** 200–400 ppm **Contact time (from label):** 60 s

Mix the solution as the label says. Test it with the matching strip or meter each time you make a new batch and at the times in your cleaning plan, and write the actual reading. If it is outside the target range, remix it, test again and write what you did.

Date	Time	Where (sink, bucket, spray bottle, dishwasher)	Product	Test (strip, meter)	Measured (ppm or %)	OK (Y/N)	Corrective action (remixed, retested)	Checked by (name, signature)
23/11	08:05	Prep sink	QAC	Test strip	300	Yes		Emma Clarke
24/11	08:10	Bar sink	QAC	Test strip	250	Yes		James Patel
25/11	08:00	Prep sink	QAC	Test strip	150	No	Remixed, retest 300 ppm	Sophie Turner
26/11	08:15	Pot wash sink	QAC	Test strip	300	Yes		Daniel Hughes
27/11	08:05	Prep sink	QAC	Test strip	350	Yes		Olivia Bennett
